

Positioning of UL quality mark

Please inform us when placing your order if a UL quality mark is required on your PCBs.

Please clearly indicate the area where you wish to have the UL logo positioned.
A border for this area will be created by our team.

The nature of the UL quality mark (e.g. silkscreen, soldermask, copper) will be inferred from your files.

The minimum area required for the UL logo is:
7 mm x 4 mm

Should you also require the manufacturer's logo,
an additional area of **12 mm x 5 mm** is required.
